

# BA400H PACKS A PUNCH.

### Ashton BA400H

The Pro-level BA400H Bass Head produces a sound so hot and heavy, it has a built in fan to keep things cool on stage. The lightweight toroidal transformer adds more power to your bass-end sound, while a range of controls including 7 band EQ, active compressor and tone shaping controls let you create almost any sound you're after - from sharp and punchy to fat and dirty, and anywhere in between.

A perfect choice for performance, with speaker outputs and XLR line for direct connection to most PA systems.
